SDG 13 CLIMATE ACTION

Take urgent action to combat climate change and its impacts

Muban Chombueng Rajabhat University promotes and supports SDG 13: Climate Action by organizing knowledge-sharing projects for students and staff, which include the following initiatives:

1. Project to Enhance Knowledge and Implement Net Zero Carbon Management

The project aims to enhance knowledge and promote the implementation of Net Zero Carbon Management within the organization, focusing on achieving carbon neutrality. The project will consist of the following activities:

1. **Carbon Neutrality Awareness Session:** On August 1, 2024, an educational session will be held to raise awareness about carbon neutrality, providing participants with knowledge on how to reduce carbon footprints and the importance of achieving net-zero carbon emissions.
2. **Plant Survey and Carbon Absorption Study:** On August 4, 11, and 12, 2024, the project will conduct a survey on plant species and their capacity to absorb carbon. This activity will take place in a designated pilot area, helping to assess how plant life can contribute to carbon sequestration and support the campus's carbon reduction efforts.

Take urgent action to combat climate change and its impacts

3. Workshop on Net Zero Carbon Organization Management: On August 28, 2024, a hands-on workshop will be held at the Center for Science and Applied Sciences. This workshop will share practical knowledge and strategies for managing organizations aiming for net-zero carbon emissions. The goal is to equip staff, faculty, and students with the tools to effectively contribute to the university's environmental sustainability goals.

Emissions and contribute to the university's sustainability efforts. The project aims to create a more sustainable, eco-friendly campus while fostering a deeper understanding of carbon management among the university community.

Take urgent action to combat climate change and its impacts

2. Living Lab Project: Food Security and Environmental Management Workshop

The Living Lab Project will be a hands-on workshop focused on food security and environmental management, running from July 24 to August 28, 2024, at Rajabhat University, Muang Chom Bueng Campus. This project aims to provide students with the opportunity to integrate their knowledge into practical, real-world applications outside of the classroom.

Project Objectives:

- To offer students a chance to apply theoretical knowledge in a practical setting, encouraging hands-on learning that fosters deeper understanding.
- To provide the university with an environmentally friendly learning space, where students can engage in real-life environmental management and sustainable food security practices.
- To promote environmental sustainability and self-sufficiency by encouraging students to actively contribute to solutions for food security and environmental challenges.

The Living Lab will serve as a valuable learning tool, where students can directly experience the challenges and solutions related to food security and environmental conservation. By participating in this project, students will be better prepared to contribute to sustainable practices in their future careers and communities.
